

PIN MILL PKM 1

REDUCING RAW MATERIALS

PIN MILL PKM is used for reducing raw materials for food and feed purposes. These are cereals (wheat, rye, barley), maize, meals and granulated dry hay. After consulting with the manufacturer can use in other fields such as chemicals.

PIN MILL PKM 1

Processed material is supplied axially by location on the top axis of the rotor pole to the inner part. By gravity and partly aspiration material falls between the pins.

Pins are placed in three rows on the stator and three rows on the rotor. Lower pin material is crushed and falls into a closet space.

Placed tangentially thrust acting out. It can be used both for pressure and free-flow traffic.

Output	t.h ⁻¹	0,5 -5
Input	kW	11 - 30
Number of revolution elmotor	rpm	2935
Weight	kg	950
